

# Tankless Water Heater Accessories

## Specification Sheet

### System Controller

- Available System Controller models can provide a central communication link for up to 6-unit, 12-unit, or 24-unit Multi-Systems
- Provides fully modulating operation among all units (user selectable option to fire 1 or 2 units default by default)
- Rotates the operation of the units within the Multi-System for even wear
- Only one Remote Controller is required to control and monitor all the units connected to the System Controller
- Pump control allows for a pump(s) to be connected and controlled with built-in timer and aquastat features
- Auxillary back up allows for continued system operation during partial failure conditions.
